DRIVEWAY & FOOTPATH PRE-COMMENCEMENT DAMAGE REPORT GUIDELINES

Location of Cracks and Footpath Damage

1. Count the slab panel starting from the corner of the front and side boundary on the left hand side when facing the property.
2. Count the panels from this starting point to the right.
3. Number the location of the damage.
4. This identification system also applies if the site is a corner block.
5. If the footpath does not extend the full site frontage, start the count at the first panel closest to the left hand side of the property.
6. See illustrations below.

Please Note:

This form will provide a record of damage to your driveway crossover and footpath prior to work commencing. This will ensure that when Council returns your bond you will not be penalised for pre-existing damage.
