

EVERTON ROAD PARKING ALTERATIONS TO IMPROVE PARKING AVAILABILITY

City of Canada Bay Parking Strategy

Background

In late 2010 Council notified the local community that pay parking was being considered. A review identified that Everton Road, Strathfield was subject to chronic parking congestion, with high demand and little or no turnover.

The parking strategy is aimed to:

- provide equitable access through increased parking turnover
- ensure some short-term parking is available
- give better access to rail and bus services

Current position

Council approved and installed parking meters in Everton Road. Everton Road will continue to have no time limits, to allow commuter parking. The Pay and Display parking meters, with credit card or coin payment facilities, were installed in February 2012.

What will the parking fees be used for?

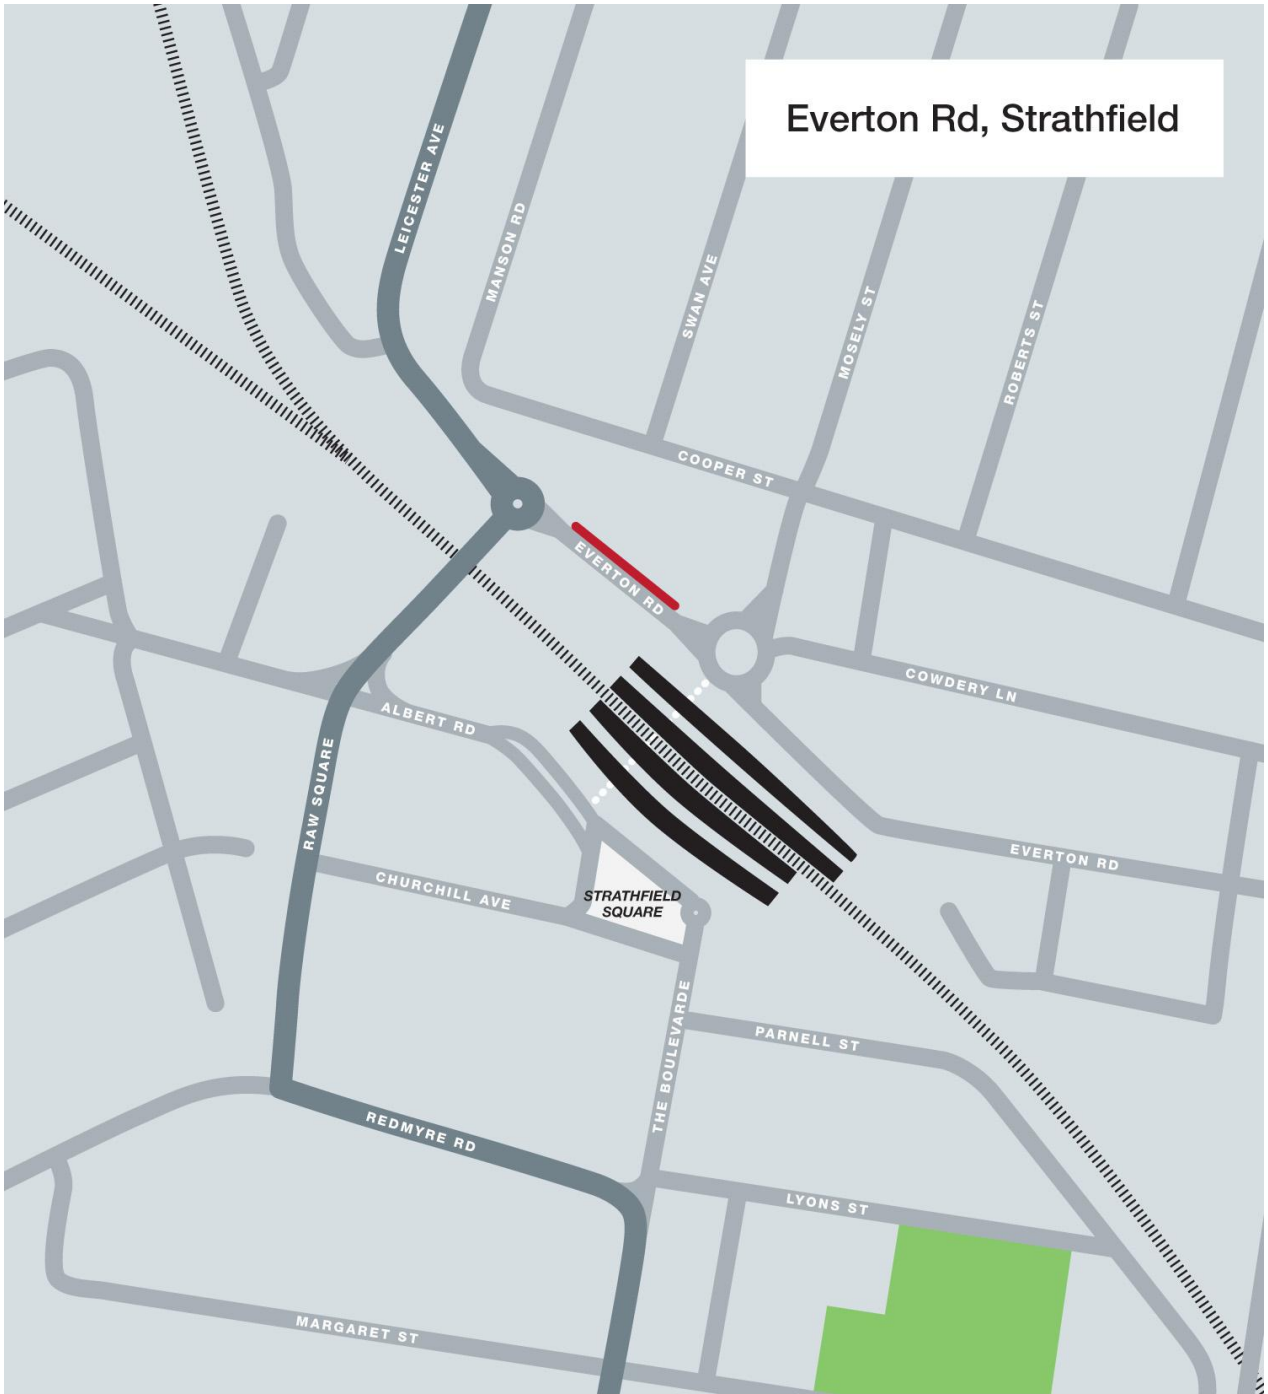

Council will use income received to fund additional public infrastructure work in the area, such as roads, lighting and footpath improvements.
